## Nonparametric Correlations

### Correlations

			studytime	traveltime
Spearman's rho	studytime	Correlation Coefficient	1.000	-.106 <sup>*</sup>
		Sig. (2-tailed)	.	.035
		N	395	395
	traveltime	Correlation Coefficient	-.106 <sup>*</sup>	1.000
		Sig. (2-tailed)	.035	.
		N	395	395

\*. Correlation is significant at the 0.05 level (2-tailed).

### Confidence Intervals of Spearman's rho

		Significance(2-tailed)	95% Confidence Intervals (2-tailed) <sup>a,b</sup>	
Spearman's rho			Lower	Upper
studytime - traveltime	-.106	.035	-.205	-.004

a. Estimation is based on Fisher's r-to-z transformation.

b. Estimation of standard error is based on the formula proposed by Fieller, Hartley, and Pearson.
